

2026 Street Maintenance Program

The Mayor and City Council recently approved the 2026 Street Resurfacing Program. This year's program includes approximately 4.9 miles of roadways throughout the City. The City of Darien is anticipating that construction will be starting early May. Our goal is to improve the streets with little inconvenience to the residents. This year's street program includes the following roads, which total 25,854 feet in length of maintenance and repairs for the City of Darien. Residents can expect to see the following road applications:

Grinding: Process utilizes equipment to remove approximately 2 - 3 inches of the existing road surface.

Leveling Binder: An asphalt product used to eliminate imperfections in the roadway.

Area Reflective Crack Control Treatment: A blanket material that prevents premature reflective cracking. The product further extends the life of the pavement. The application of the product is completed approximately 24 hours prior to the final application.

Progress information will also be available through the City's website, www.darien.il.us, Direct Connect, Facebook, the cable channel.

STREET	SUBDIVISION/LIMIT	LAST REHAB
Roger Road	Clarendon Hills Rd – Plainfield Rd	2013
